

THE CONSCIOUS FARMER

WELCOME

The Conscious Farmer (TCF) consults and coaches on organic, dynamic agriculture and food, based on a conscious lifestyle: 'I am the earth'. Our consultants work worldwide with our home base, the TCF Training Center, located in the Sauerland, Germany. We are an open and independent platform for coaching, training, workshops, information and we offer accommodation. We are happy to keep you informed of our most recent developments.

TCF B&B and Training Center

Autumn is one of the most beautiful times in the Sauerland. If you like to hike or prefer mountain bike tours, our area is the one for you.

Besides excursions in the colourful autumn forests, there is a lot to discover for the whole family. For example, the circular trail Goudspoor in Eimelroth, a bat safari or a day at the farm. In bad weather, there are numerous interesting activities such as blowing glass yourself in the glass studio, making your own butter at the Molkerei or exploring the old slate mine.

There is also a new attraction and not just any one: Skywalk Willingen has opened! The Skywalk is Germany's longest suspension bridge and a fun adventure activity for young and old. It's an experience to walk so long, so high above the ground and enjoy the amazing view.

Come and spend a few days in the Sauerland this autumn, at weekends or during the week, whenever you like! Our low-season prices apply from 1 November to 23 December.

See you in Schwalefeld!

TCF Consultancy

Aldo and Mark, our consultants, talk about their conversion campaign:

We are frequently asked to support the conversion from conventional crops to 100% organic or 100% pesticide-free. With a well-devised step-by-step plan, we guide the grower who wants to work without chemicals, including everything that comes with it.

We show that it can be done differently, by cultivating in a clean way, also for the environment. And now we have the wind in our sails: pesticides are slowly but surely being phased out. The Green Deal regulations in Europe target a 50% reduction by 2030, but many horticulturists are already looking a lot further ahead, also because consumers and retailers want cleaner products.

In practice, our approach realises high quality and productivity and organic crop protection is on average 50% less expensive than usual.

Since 2018, we have been helping organic and conventional growers worldwide with our campaign. It now totals nearly 200 hectares of greenhouse horticulture, and growers who want to convert are coming in regularly. We are happy to help, because together we can make a difference: 'We are the Earth'.

Our vision

The Earth is not just a planet, it is also a being that exists within a greater system. We as humanity, are one with the Earth from our beginnings: we are the Earth.
